Teacher device — desktop app
the full CorpusMind installation, unchanged
Analysis engine + teacher's corpora
private project storage; nothing is copied to students
Classroom server (Caddy sidecar)
serves a read-only view of the analysis tools and AI assistant
Local language model (Ollama)
student queries answered on the teacher's hardware
Anonymous audit log
every student query + the model's answer — no IPs, tokens or session IDs
URL / QR join →
one-time admission, capped seats
↔ Classroom LAN only
HTTP within the local network; no cloud relay
← Queries + answers
read-only results; nothing persists on devices
Student devices
any phone or tablet browser — nothing installed
Join by URL or QR code
one tap; the seat cap decides admission
Read-only analysis tools
concordance, collocation, dispersion … on the teacher's corpora
Grounded AI assistant
same citation contract as the desktop app
